

Six Shot Locations

Angle Ratings

How Shot Location and Openness Effects eFG%

~ The eFG% for the respective region is shown in black, the red numbers show the decrease in effectiveness (% Change) from the the previous graph.
 i.e. A Semi Open corner three is 22% less effective than a Very Open corner three.
 Openness = (defender distance / shot distance) * Angle Region multiplier

- Top 5 Shots:**
1. Very Open Corner Three (.74)
 2. Very Open In Restricted Area (.67)
 3. Very Open Top Three (.64)
 4. Very Open Non Restricted Paint (.61)
 5. Semi Open Corner Three (.58)
